

Dear CBA members,

I wanted to call your attention to an addendum to the rules of the photo contest that you recently received via email. **We are now requiring only a digital photograph for submission to the contest;** 8X10 framed prints are no longer necessary. Unfortunately, we didn't make this change until the flyers announcing the contest had already gone to print. In the interest of the environment, we elected not to reprint the flyers under the incorrect assumption that anyone with an interest in entering the photo contest would visit the rules of the contest on our website and see that we had made this change. After receiving several inquiries from CBA members, we realized our gaffe; if the rules described on the flyer are prohibitive, folks aren't going to waste energy visiting the website!

So please don't let our blunder get in the way of you submitting a photograph! Submission will require a digital copy on CD and the entry form available on the website <http://www.owc.edu/MattieKellyInstitute/env-symposium.cfm>. We also had an inquiry about email submissions of photographs - this would be fine as long as we have your signature on the entry form, so you will have to print it out and then scan it in to email it to me. Please email any submissions to: [MMKSymposium@owc.edu](mailto:MMKSymposium@owc.edu) with "photo contest" as the subject line and your photos named as your last name (numbered 1 through 3 if you submit more than one photo).

If you have any questions, please don't hesitate to contact me. I look forward to all the photos coming in!

Best, Allison Beauregard
